

## **Required Inspections:**

- Erosion control site initial inspection
- Footing
- Slab/Floor
- Both open-trench plumbing and in-slab plumbing
- Sheathing/nail pattern
- Energy compliance/insulation
- HVAC duct blast testing - file a copy of test results with the Building Department
- Rough-ins for plumbing, electrical, HVAC and framing, called in as either a 3-way or 4-way inspection
- Erosion control final site inspection
- Final inspection
- Site inspections will be conducted routinely at each construction inspection and on occasions when a complaint has been filed with the Building Department.
- Apart from the initial and final inspections, all erosion control inspections will be performed on an "as-needed" basis until completion of the project.
